

Vorne *manufacturing improvement made easy*

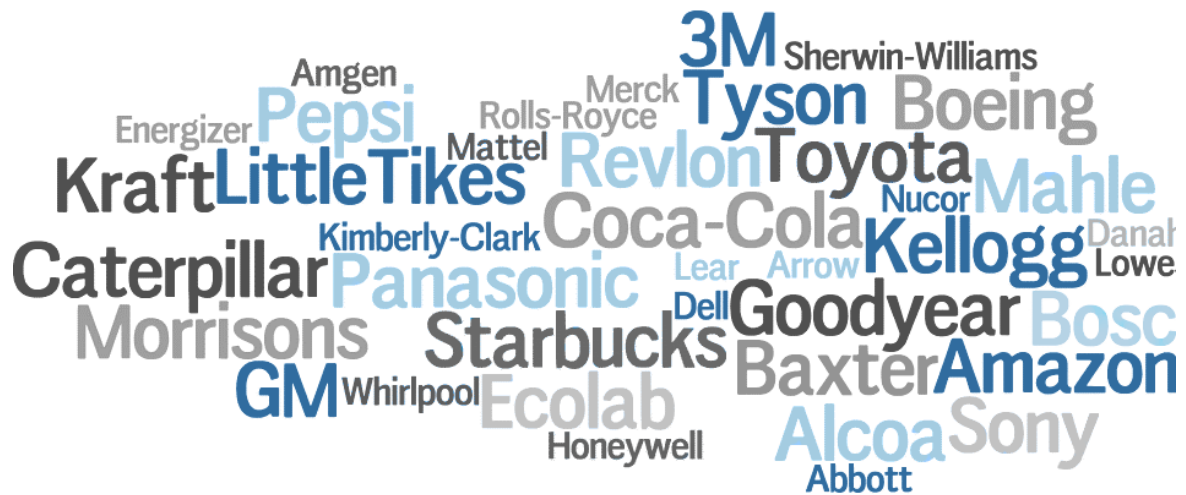

Join Tens of Thousands Who Benefit from XL

The [XL Productivity Appliance](#)™ is used in over 20,000 applications and 45 different countries. Those numbers are impressive – but what really matters is how well it will work for you. That is why two of the most common questions I field are: Who uses XL? Will XL work for my process? Let’s answer those questions.

Who Uses XL?

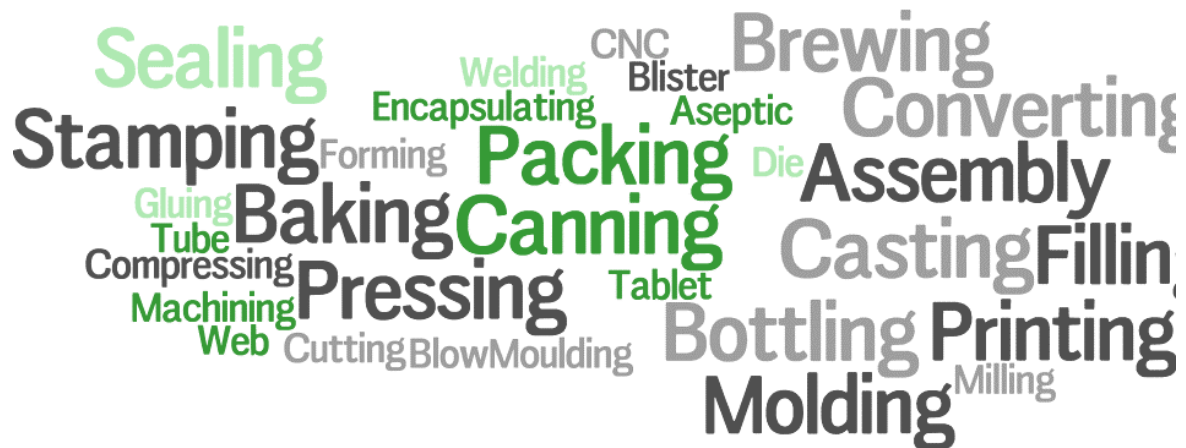

XL is used by thousands of companies ranging from single locations with one production process to global conglomerates with hundreds of manufacturing lines. Here are a few examples of companies that use XL:

You can view even more [companies that use XL \(along with their industries\)](#) on our website.

What Processes Use XL?

XL can be applied to any discrete manufacturing process. If you can provide a pulse or signal for each cycle or piece you make - XL will work for you. Here is a sampling of 30 types of manufacturing processes where XL is used:

Your Company. Your Process.

As we said earlier, what really matters is how well XL will work for you and your process. That is why this is one of the first topics we explore in depth during our introductory webinar. Let's get started.
